Rest

A full night's sleep restored d6 HP by default.

A warm and steady meal doubles the healing, while skipping a meal doesn't heal at all and makes the character HUNGRY, +2DR Strength and Presence.

Not eating or drinking for 2 days causes the character to starve, d4 hp is lost daily.

Without sleep a character is TIRED, +2DR Agility and Toughness every day, and they don't heal on the next rest.

Sleep is for the weak

Infection

Roll a d4 after combat, if the result is equal, or higher, to your current hp your wounds are infected

An infected character does not benefit from resting, instead, d6 HP is lost daily.
